DL2000

AUTOMATED COMPLETE SYSTEM

Deburring • Edge rounding Cleaning • Degreasing

Compact, space-saving machine design with multiple spirally arranged working tub. Ideal to treat different parts in a continuous process. Gentle and low-contact treatment thanks to timed addition of parts.

Technical data:

- Space-saving design with high rate of production
- Tub lining made of wear-resistant polyurethane
- Continuous return of processing media on two or three levels
- Integrated separation unit to separate media and parts as well as to remove undersize media (undersize separation)

Optional features:

- Additional separation zone for the separation of parts and media
- Sound protection cabin to encase the whole production unit
- Integration into a complete production line including feeding and discharge, cleaning as well as drying of the parts

Technical data:						
Description		DL600	DL1000	DL2000		
Working tub volume	1	340	1000	2000		
Length of processing zone	m	11	18	14		
Levels of processing zone		3	3	2		
Operating voltage	V I Hz	400 50	400 50	400 50		
Drive power	kW	3,0	12,4	12,4		
Empty weight basic machine	kg	2000	3700	4400		
Operating weight max.	kg	3000	5500	7000		
Space requirement	m²	3	7	10		

Dimensions in mm:						
Description		DL600	DL1000	DL2000		
Width throughfeed vibrator incl. separation unit	Α	2060	2690	3620		
Width discharge	В	350	390	540		
Length throughfeed vibrator incl. separation unit	С	1850	2600	2970		
Diameter throughfeed vibrator	D	1480	2325	2830		
Width working tub	Ε	240	255	395		
Bottom edge discharge	F	1200	1710	1770		
Top edge throughfeed vibrator	G	1680	2105	2280		
Width entry	Н	300	360	560		
Bottom edge entry	1	835	860	1220
